

WHAT IF farmers COULDN'T use GMOs?

More than **3/4** of farmers believe there would be increased environmental impacts including but not limited to the use of more water.

1/3 of farmers believe they'd see reduced soil health if GMO seeds were no longer available.

87% believe GMO seeds allow them to minimize pesticide/herbicide usage.

2/3 of farmers say GMOs allow for more efficient use of fuel and time, and less wear on equipment.
